

# The Danger of Underestimating Obama

August 10, 2011

Dear Friends,

I want to recommend for your reading this excellent article from the *Washington Times* written by Congressman Dan Burton of Indiana. Our country is facing a grave economic crisis and many attribute this to Obama's inexperience and incompetence.

Not entirely true, says Burton. He argues persuasively that Obama knows exactly what he is doing and the American people underestimate him at their peril. We had all better wake up to the threat his policies pose. North Carolina is not a safe haven from Obama-style socialist policies. What happens in Washington is seriously impacting job creation and economic growth in the Tar Heel State.

The Obama political machine now controls the NC Democratic Party. Even as I write this, Obama has political operatives working full time in New Hanover County registering voters. Governor Perdue's re-election campaign is run by an Obama strategist and she vetoed the Voter-ID bill. I agree with Rep. Burton-- we underestimate this threat to America and North Carolina at our peril.
